

INTERNSHIP OPPORTUNITIES

Alta Genetics is excited to tailor an internship to fit your interests!

Alta Advantage® Internship

Responsibilities of this internship will include monitoring activities in the Alta Advantage® progeny test program, evaluating Alta Advantage® milking daughters, assisting with and preparing daughters for professional photos, helping with Holstein SET classifications, and preparing and presenting a consultative final presentation to an Alta partner dairy.

Alta Genetics Jersey Program Internship

Will allow the candidate to explore the various departments within Alta from a Jersey-based perspective. This internship will be a challenge in sales, marketing and reproductive management with progressive dairy producers. It allows for flexibility in location and a tailored set of responsibilities

Saskatoon Colostrum Company and Calf's Choice Total Internship

This internship will challenge the sales and marketing skills of the candidate, who will be working with employees of both Alta Genetics and the Saskatoon Colostrum Company, to raise awareness of the Calf's Choice Total product among veterinarians and dairy producers

Valley Ag Software and DairyComp 305 Internship

An interest and experience with dairy herd management software will help the ideal candidate increase the understanding, awareness of DairyComp 305 and the other herd management software programs offered by Valley Ag Software such as Feed Watch and Parlor Watch

Reproductive Management and AI Technician Internships

The ideal candidate will have a desire to learn and experience all aspects of the reproductive program on a dairy farm, including work with synchronization programs and reproductive analysis, heat detection, inseminating cows, herd pregnancy checks and computer data entry

REQUIREMENTS

- Relevant coursework in Dairy Science, Animal Science, Life Sciences Communication or Ag-Economics
- Self-motivated dairy enthusiast who is willing to learn
- Interest in working with progressive dairies
- Strong dairy background and willingness to travel
- Experience with Microsoft Office
- Basic knowledge of farm-management programs (DC305, PCDart, DairyQuest, DHI Plus)
- Excellent teamwork and communication skills
- Detail-oriented
- Time-management skills
- Valid driver's license

BENEFITS

- Work with some of the most progressive dairy producers
- Gain proficiency in dairy herd management programs
- Network with leading AI professionals and producers
- Utilize skills learned in school within the industry
- Travel to prominent dairy areas throughout the country

"This experience has prepared me for a career in the dairy industry. The networking opportunity in addition to the time management and communication skills I attained is invaluable. The Alta team was always helpful and energetic with advice and support, taking this experience to another level and really teaching me the value of teamwork."

-PHIL MONSON, UW-MADISON

"I really liked Alta's internship program because it was flexible and was set up to match your goals and what you wanted to get out of it. Also, it provided a wide array of tasks and experiences for each intern. By the end of the summer it was clear to me that Alta is an industry leader in dairy cattle genetics and they build strong relationships with their clients."

-APRIL JOHNSON, SDSU
